

San Pila

Product Owner

I have more than 8 years of experience in software development, web applications, frontend development, and digital product development. Currently, I work as a Product Owner and Frontend Developer, combining technical expertise with product and business responsibilities.

I have experience working with stakeholders and cross-functional teams to gather and analyze requirements, define product priorities, manage roadmaps and backlogs, plan sprints, and deliver digital products. I work closely with development teams to translate business and user needs into clear, practical, and valuable solutions.

My technical expertise includes React.js, Vue.js, Nuxt.js, JavaScript, TypeScript, Node.js, PHP, Laravel, and MySQL. This technical background allows me to communicate effectively with development teams and understand both business requirements and technical perspectives. I am also experienced in Agile/Scrum, Jira, Git, testing, debugging, and deployment.

I am a motivated, adaptable, and solution-oriented professional who enjoys solving problems, improving digital products, and creating solutions that deliver value to both users and businesses.

My Experience

Product Owner / Frontend Developer

Everlast & Apps Dev Co., Ltd

Jun 2022- Present

- Developed and maintained dynamic, responsive web applications using Vue.js, Nuxt.js, and React.js, with a focus on performance, scalability, and user experience.
- Translated business and user needs into clear product requirements, user stories, and acceptance criteria.
- Drove product vision and strategy, including roadmap planning, backlog management, and feature prioritization based on stakeholder and user needs.
- Owned and prioritized the product backlog, defined user stories, and partnered with cross-functional teams to deliver high-quality features in sprints
- Coordinated end-to-end product development, including sprint planning and backlog grooming
- Defined KPIs, tracked delivery in Jira, and monitored post-deployment product metrics to guide feature iteration and improvements
- Conducted systematic testing, debugging, and regular maintenance to improve application functionality, stability, and product quality
- Improved functionality and user experience through feedback-driven iteration and user testing
- Collected user feedback, monitored product performance and KPIs, and continuously improved features based on data and user needs.
- Collaborated with leadership in weekly stakeholder meetings, providing technical and product insights for decisions and project direction
- Streamlined deployment processes by overseeing server integration and seamless product releases
- Used Jira and GitLab for Agile task management, collaboration, version control, and development workflows.
- Applied SEO best practices to improve web visibility and traffic

Web DeDeveloper

iOne Co., Ltd.

Jan 2020-May 2022

- Built, designed, developed, and modified responsive web applications with Laravel, PHP, MySQL, JavaScript, jQuery, Ajax, HTML/CSS3, Bootstrap, and Nuxt.js
- Built the Nuxt.js iOneCards e-commerce platform with English and Khmer support and PWA capabilities
- Developed Android applications using Java and Kotlin
- Designed and implemented custom web templates to meet client requirements and improve user experience
- Analyzed and designed databases to support application requirements and reliable data operations
- Conducted testing, identified bugs and errors, and performed maintenance to improve application functionality and stability
- Improved website functionality and user experience through iterative feedback, user testing, and bug resolution
- Applied SEO best practices to improve web visibility and traffic
- Collected user feedback, monitored product performance and KPIs, and continuously improved features based on data and user needs.
- Used GitLab for version control, code quality, and collaboration, and Jira for task tracking, project management, and workflow optimization

Web DeDeveloper

Second Chance Co., Ltd.

May 2018 – Dec 2019

- Developed and maintained web applications with ASP.NET MVC, ASP.NET Core, C#, SQL, JavaScript, jQuery, Ajax, and Bootstrap
- Implemented blockchain payment transactions using MetaMask and MyEtherWallet
- Created custom web templates to meet project requirements and improve user experience
- Maintained and improved website functionality through iterative feedback and user testing
- Tested web applications, identified bugs and errors, and delivered fixes to improve stability
- Used GitLab for version control, code quality, and collaboration; optimized workflows.
- Maintain and improve website functionality and user experience through iterative feedback and user testing.
- Utilize GitLab for version control and project management, maintaining code quality and collaboration.
- Oversee project deployment to the server, ensuring seamless integration and operation.
- Test and finding out bug / error all web application
- Contributed to blockchain projects, attended an Intel IoT workshop in Malaysia, and interviewed candidates

VR Product Developer

Lastmile Co., Ltd.

Apr 2017 – Apr 2018

- Spearheaded end-to-end development of 2D/3D applications (Mobile/Windows) and Mixed Reality (VR) experiences, aligning technical execution with user needs and business objectives.
- Led UI/UX design for immersive environments, creating intuitive 2D/3D interfaces and animations to enhance user engagement.
- Optimized performance through lightweight packaging, performance profiling, and iterative testing (e.g., frame rate optimization, asset compression).
- Learn and research new function, new technology related to real estate.

E-Commerce & Digital Product Development

Freelancer | Noton University

Sep 2016 – Sep 2016

- Led the end-to-end development of Angkorcolor Construction's online shop, designing and implementing a customer-centric e-commerce platform to drive sales and user engagement.
- Built and optimized an exhibition website to showcase products, improving brand visibility and lead generation.
- Collaborated with marketing and sales teams to align web features with business goals, ensuring seamless user journeys from browsing to checkout.

Mobile Game Development & Product Strategy

Noton University

Oct 2015 – Oct 2015

- Led the full product lifecycle of Image Puzzle Game, from concept to launch, delivering an engaging and intuitive puzzle experience for Android users.
- Designed and developed the Exhibition Image Puzzle Game app, optimizing performance and user retention through iterative testing and updates.
- Analyzed player behavior and feedback to refine game mechanics, difficulty levels, and in-app features for enhanced engagement.

Education

English short courses

Pannasastra University of Cambodia (PUC

2015 – 2017

Computer Science Bachelor Degree | University

Norton University

2012 - 2016

- Also Outstanding student, class monitor

Science | Highschool

Kampong Trabek High School

2009 - 2012

Training Courses & Achievements

Microsoft Visual C# Crystal Report & SQL server

Vocation Training

Jan 2016 – Apr 2016
